.NET DEVELOPMENT

Microsoft®
.NET
Framework

TABLE OF CONTENTS

1. INTRODUCTION TO .NET

- *What Is .Net And History Of .Net?*
- *Features Of .Net*

2. LANGUAGE AND FUNDAMENTAL

- *Data Type & Control Constructs*
- *Value & Reference Types*
- *Declaring & Initializing Variables*
- *Unicode Characters & Strings*
- *C.T.S Type*
- *Implicitly Typed Local Variables*
- *Conditional Syntax*
- *C# Operator*
- *Looping Syntax*
- *Structure*

TABLE OF CONTENTS

3. ARRAY & STRING

- *Arrays In General*
- *Declaring Of Different Type Arrays*
- *Initializing Arrays*
- *Accessing Element Of Different Type Array Members*
- *Arrays Of Objects*
- *Structure Type Array*
- *Understanding System*
- *String Class & It's Various Operations*

4. OOPS CONCEPTS CLASSES

- *Encapsulating Attribute*
- *Class & Object Creation*
- *Define Constructor*
- *Type Of Constructor*
- *Define Methods & Their Type*
- *Overloading Methods & Constructor Overloading*
- *Define Property & Their Types*
- *The Memory Allocation With New Keyword*
- *Passing Initial Values With Constructor*
- *Invoking Property & Methods*

TABLE OF CONTENTS

5. INHERITANCE

- *What is Inheritance?*
- *Implementing Inheritance Hierarchies*
- *Class Access Modifiers*
- *Method Overloading, Overriding & Hiding Concepts*
- *Run Time Polymorphism*
- *Abstract & Sealed Class*
- *Exposing Interface*
- *Implementing Interface In Class*
- *Play With Namespaces*
- *Interface Polymorphism*
- *Operator Overloading*
- *Partial Class*

6. EXCEPTION HANDLING

- *Meaning of Error, Bug & Exceptions*
- *Role of .Net Exception Handling*
- *System Level Exception*
- *Application Level Exception*
- *Try & Catch Block*
- *Handling Multiple Exception*
- *Finally Block*
- *Throw Exception On Request Custom Exception*

TABLE OF CONTENTS

7. EVENTS AND DELEGATES

- *Event Driven Programming*
- *Delegate, Event & It's Association*
- *Synchronous & Asynchronous Operation With Delegate*
- *User Defined Events & Delegates*
- *Multicasting With Delegates*
- *Anonymous Methods*
- *Anonymous Methods With Events*
- *Generic Delegates*

8. MULTITHREADING

- *Understand Multithreading Process*
- *System Threading Namespace*
- *Thread & Thread Start Class*
- *Thread Life Cycle*
- *Thread Safety Concept*
- *Thread Synchronization*
- *Understanding Thread Pool*
- *Understanding Role Of Thread Background Worker Component*

TABLE OF CONTENTS

9. I/O OPERATIONS WITH FILE SYSTEMS

- *File & Directory Class*
- *Marshal Classes, File Info & Directory Info*
- *Path Class*
- *Drive Info Class*
- *Stream Object With Files:*
 - *Stream Reader*
 - *Stream Writer*
- *File Stream & Memory Stream*

10. INTRODUCTION TO ADO.NET

- *How ADO.NET Works & How It Differs From ADO?*
- *Evolution Of ADO to ADO.NET*

11. ADO.NET AND IT'S ARCHITECTURE

- *Connection Object*
- *Command Object*
- *Dataset*
- *Data Reader Object*
- *Data Adapter Object*
- *Concurrency & Disconnected Data Architecture Provider*

TABLE OF CONTENTS

12. DATA SET

- *Creating Tables In Dataset*
- *Data Column*
- *Data Row*
- *Data Table*
- *Updating, Inserting & Modification in Data Table*
- *Saving Changes Into Data Base Using Command Builder*
- *Working With Command & Connection*

13. CONNECTIONS AND COMMAND OBJECT

- *Connection Object*
- *Command Object*
- *Execute Non Query*
- *Execute Scalar*

14. DATA READER

- *Reading Data In Connected Environment*
- *Moving & Accessing Value Of Record*
- *Execute Reader*

TABLE OF CONTENTS

15. DATAGRIDVIEW & DATA BINDING

- *Row State Filter & Sort Property*
- *Update Records Via Data Grid View*
- *Insert Records Via Data Grid View*
- *Delete Records Via Data Grid View*

16. TRANSACTION

- *Introduction Of Transaction (ACID)*
- *Transaction Class*
- *Method & Property*
- *Commit & Rollback*

17. INTRODUCTION TO WEB FORM

- *Need Of Web Application*
- *Http Protocol*
- *Static & Dynamic Page Concept*
- *Working Of IIS & Browser*
- *Differences Between ASP & ASP.NET*

TABLE OF CONTENTS

18. INTRODUCTION TO HTML CONTROLS

- *Creating Simple HTML Page*
- *HTML Tags*
- *Hosting HTML Page*
- *IIS Virtual Directory*
- *Request Transfer Throws Get & Post Methods*

19. SERVER PAGES USING ASP.NET

- *Creating Sever Pages*
- *Architecture Of Handling Request In Web Server*
- *HTTP Request Object*
- *HTTP Response Object*
- *Understanding Post Back*

20. UNDERSTANDING PAGE LIFE CYCLE

- *Understanding Of Application Life Cycle*
- *Page Life Cycle Stages*
- *Life Cycle Events*
- *Auto Event Wireup*
- *Tracing & Debugging ASP.NET Pages*

TABLE OF CONTENTS

21. STATE MANAGEMENT

- *Client Side State Management*
- *Introduction Of Stateless Process*
- *HTTP Cookies*
- *Query String Method*
- *View State*
- *Hidden Field*
- *Server Side State Management*
- *HTTP Session*
- *HTTP Application*
- *Global .ASAX*
- *Web .Config*

22. SERVER CONTROL FORM VALIDATION

- *Working With Range, Regular Expression & Compare*
- *Required Field Validator Controls*
- *Use Control To Validate Property*
- *Custom Validator Control*
- *Implementation of Client & Server Side Validation*
- *Working With Validation Summary*

TABLE OF CONTENTS

23. WEB FORM CONTROL

- *Textbox*
- *Check Box*
- *List Box*
- *Dropdown List Control*
- *Add Rotator Control*
- *File Upload Control*
- *Multi View Control*
- *Login Control*
- *Image Control*
- *Radio Button Control*

24. DATA BINDING SERVER CONTROLS

- *Use Of Data Binding Control*
- *Type Of Data Binding Control*
 - *Formatted*
 - *Unformatted*

TABLE OF CONTENTS

25. WORKING WITH GRID VIEW CONTROL

- *Data Binding With Grid View*
- *Working With Column Collection Using Paging Sort*
- *Working With Data List Control*
- *Working With Template*
- *Working With Data List Events*

26. MASTER PAGES

- *Introduction & Need Of Master Page*
- *Creating Master Page*
- *Default Contents*
- *Master Page With CSS & Table Layout*
- *Applying Master Page Through Configuration File*
- *Dynamic Setting Master Page*
- *Nested Master Page*
- *Master Page & Relative Path*

27. ASP.NET WEB SECURITY

- *Windows*
- *Forms*
- *Passport*

TABLE OF CONTENTS

28. ASP.NET AJAX

- *Introduction of AJAX*
- *Creating An AJAX Enabled Web Service*
- *Role Of Script Manager*
- *Understanding & Working With Update Panel*
- *Understanding & Working With Timer Control*
- *Creating AJAX Enabled Website*

29. SKIN & THEME

- *Cascading Style Sheet*
- *Scoping Themes*
- *Themes vs Cascading Style Sheet*
- *Create A Skin*
- *Apply Theme To Website*

30. CASCADING STYLE SHEET

- *Creating Style Sheet*
- *Apply Style Sheet*
- *Creating Rules*
- *Creating Elements Setting*

TABLE OF CONTENTS

31. ASP.NET CACHING

- *Introduction ,Need*
- *Type Of Caching*
 - *Page Output Caching*
 - *Declarative Output Caching*
- *Time Duration & Location Setting*
- *Parameter Caching Settings*
- *Page Fragment Caching*
- *Caching With HTTP Cache Policy Class*
- *Post Cache Substitution & Fragment*
- *Data Caching*
- *Managing Data Into Cache*
- *XML Classes*

32. MORE DATA BINDING SERVER CONTROLS

- *Working With Form View*
- *Control Working With Template*
- *Working With Form View Events*
- *Working With Details View Control*
- *Working With Template*
- *Working With Details View Events*
- *Understand Event Bubbling*

33. LIVE PROJECT
